	Appendix 4 Guidelines on Exemption of Requirement on Theoretical Hour for Registered Nurse (General) training	40

I. PREAMBLE

The completion of the transition of nursing education to tertiary institutes in 2002 has denoted the success of the Hong Kong SAR in advancing nursing education to tertiary level in line with international development. To meet the new developments of the health care system and the evolving demands for a more diverse and high quality nursing service at the primary, secondary and tertiary levels of health care, there is a need to develop a new generation of Registered Nurses (RN) with enhanced professional competencies. Hence, the development of an enriched and expanded nursing curriculum is essential for the education of RNs. This new syllabus replaces the one published in 2009. It serves as an up-dated guide for curriculum development of pre-registration general nursing programmes. Upon completion of such programmes and having passed the examinations recognized by the Nursing Council of Hong Kong (NCHK), students are expected to have acquired the essential competencies for safe, effective and ethical practice, and will be eligible to apply for registration with the NCHK as a Registered Nurse (General) [RN (G)] in Hong Kong.

II. AIMS AND OBJECTIVES

To allow flexibility, creativity and adaptability in curriculum development, the syllabus is written in broad terms. It is intended to achieve the following aims and objectives:

AIMS: To serve as :

1. a reference frame for assessing the eligibility of nurses trained outside Hong Kong Special Administrative Region (HKSAR) for registration as a RN(G).
2. a reference base for accrediting general nursing education programmes.

OBJECTIVES:

1. State the nursing philosophy based on which the syllabus is developed.
2. Highlight the core components of nursing studies, including the theories and practice of professional nursing at the three levels of health care and in different health care specialties/settings; nursing management, research and professional development.
3. Specify the requirements for other related subjects in support of the nursing studies, such as communication, social and behavioral sciences, biological and integrated sciences as well as legal, ethical and cultural issues.
4. Suggest the number of hours for the different subjects, both in theory and in practice, and provide guidance on the form of assessments required.

III. PHILOSOPHY OF NURSING

This stated philosophy of nursing summarizes our beliefs in the nature and practice of professional nursing, as well as our views on the person, the environment and health. It provides a basis for the revision of the nursing syllabus that guides the development of education programmes for RN (G).

Nursing is a caring, enabling, knowledge-based and competence-assessed profession which is dynamic in meeting the changing health needs of the society. It is committed to promoting and maintaining health; as well as to caring for the sick and the disabled as individuals, or in families, groups, institutions, home settings and in the community.

The practice of nursing is client-focused and evidence-based. It is carried out at the primary, secondary and tertiary levels of health care. It functions through problem solving and collaboration with the client as well as other health care professionals to define and achieve mutually agreed health goals.

The provision of holistic, client-centred care requires research-based professional knowledge and skills through the implementation of the nursing process; the adoption of a caring and responsible attitude; effective communication and interpersonal skill as well as ethical principles. The quality of care is maintained through the enhancement of professional competencies via continuous nursing education.

The person is a unique, holistic being with the potential to learn and develop through interacting with the changing environment. Each person has intrinsic worth and has the right to participate in the decision-making which affects his/her own life and dignity, and must always be treated with respect.

The environment consists of external and internal components which change constantly and generate both positive and negative stressors. The internal environment of a person, comprising biological, psychological, spiritual and intellectual components, interacts with the external environment that encompasses social, cultural and situational influences. This continual interaction affects the person's functioning as an individual, as well as in families, groups and community. The creation, preservation and conservation of a healthy environment is crucial to the maintenance and promotion of health.

Health is a state of well-being, perceived differently by the individual at specific points in time along the health-illness continuum. It is affected by biological, psychological, socio-economical, developmental, political, cultural and religious factors. The level of well-being depends on the maintenance of equilibrium within the person, and between the person's interaction with the changing environment.

IV. THEORETICAL REQUIREMENTS

Overview of Contact Hours¹ (Including Laboratory Hours)

Competence Area 1: Professional, legal and Ethical Nursing Practice		
Item	Topics	Minimum Hours
1A. <i>1A.1</i> <i>1A.2.</i> <i>1A.3.</i> <i>1A.4.</i> <i>1A.5.</i> <i>1A.6.</i>	General, Behavioural and Life Sciences Relevant to Nursing <i>Human Anatomy, Physiology and pathophysiology</i> <i>Sociology of Health</i> <i>Applied Psychology</i> <i>Fundamental Pharmacology</i> <i>Microbiology</i> <i>Nutrition and Dietetics</i>	320
1B. <i>1B.1.</i> <i>1B.2.</i>	Professional Nursing Practice <i>The Nursing Profession</i> Basic Nursing for Safe Practice: (Please refer to Appendix 1 for details.) I. The nursing process II. Essential nursing techniques in clinical setting for safe practice: 1. Provision of a safe and comfortable environment for care 2. Maintenance and promotion of occupational safety and health 3. Documentation and reporting of care 4. Helping the client meet the basic needs of living 5. Assisting the client to undertake diagnostic procedures 6. Administration of medications 7. Principles of First Aid 8. Infection Control III. Principle and practice of nursing: 1. Accident and emergency (A&E) nursing 2. Peri-operative nursing 3. Introduction to operating theatre techniques, intra-operative care and anaesthetic nursing 4. Medical and surgical nursing related to illness prevention and health restoration of clients with alteration in various body system functions across the life span 5. Rehabilitative nursing 6. Oncology nursing and palliative care 7. Paediatric and adolescent nursing 8. Obstetric nursing 9. Gerontological nursing 10. Mental health nursing 11. Community nursing 12. Chinese medicinal nursing and complementary and alternative medicine	712

¹ The term “contact hours” refers to the amount of time (in terms of hours) spent by a learner in direct contact with the teaching/training staff of a programme. It includes attendance in class, tutorials, nursing laboratory practice, conducting experiment in laboratory under supervision and supervised session in placement and workshop. For other modes of learning, the Nursing Council of Hong Kong will assess the individual case of merit in the light that there is structured content with learning outcomes, and has interaction and assessment components.

Competence Area 1: Professional, legal and Ethical Nursing Practice (Cont'd)		
Item	Topics	Minimum Hours
1C.	Legal & Ethical Issues	40
<i>1C.1.</i>	<i>Legal Aspects Pertinent to Nursing Practice</i>	
<i>1C.2.</i>	<i>Ethical Issues</i>	
1D.	Communication	20
1E.	Rights and Responsibilities of the Individual	(Included in 1A.2 and 1C.1)
1F.	Information Technology in Nursing and Health Care	20
Competence Area 2: Health Promotion and Health Education		
2A.	Education Theories and Methods	10
2B.	Concepts of Health, Health Education and Health Promotion	40
2C.	Communication	(Included in 1D)
2D.	Rights and Responsibilities of the Individual	(Included in 1E)
Competence Area 3: Management and Leadership		
3A.	Management Theories, Skills and Application	20
3B.	Leadership	5
3C.	Health Care Policies	15
Competence Area 4: Research		
4A.	Basic Knowledge in Conducting Research in Health Care Settings	40
4B.	Appraising and Utilizing Research Findings	
Competence Area 5: Personal Effectiveness and Professional Development		
5A.	Personal Effectiveness	(Included in 1A.3)
5B.	Profession Development	2
5C.	Establishing and Maintaining Nursing as a Profession	6
Total:		1,250

V. Clinical Practice Requirements

Clinical Areas		Minimum Practice Requirement (Hours)
1.	Medical Nursing For example: General Medicine, Dermatology, Infectious Diseases, Oncology Nursing and Palliative Care, Rehabilitation, Out-patient Department (OPD)	440
2.	Surgical Nursing For example: General Surgery, Day Surgery, Operating Theatre and Recovery Room, Cardiothoracic Surgery, Neuro-surgery, Gynaecology, Ear, Nose and Throat (ENT) Care, Ophthalmology Orthopaedics and Traumatology, Rehabilitation, OPD	330
3.	Paediatric and Adolescent Nursing For example: Paediatrics, Neonates, Adolescent Care, School Clinic	60
4.	Obstetric Nursing	60
5.	Gerontological Nursing	60
6.	Mental Health Nursing	60
7.	Community Nursing	60
8.	Primary Health Care	60
9.	Accident and Emergency Department	60
10.	<i>Any clinical area(s) among item 1 to item 9</i>	210
Total:		1400

Note 1: The above should include a period of continuous clinical practice of not less than 3 months.

Note 2: Clinical training for local nursing students can be conducted in the following health care institutions:

Category A: *Hospitals or medical institutions under the management of the Hospital Authority or private hospitals registered under the Hospitals, Nursing Homes and Maternity Homes Registration Ordinance (Cap. 165, Laws of Hong Kong), where in-patient care is provided (Not less than 70% of the total hours of clinical education).*

Category B: *Community settings where the provision of first level care is evident (Not more than 30% of the total hours of clinical education). Not more than one-tenth of this part of training may be conducted outside Hong Kong.*

Note 3: During the clinical practicum, there must be a system in place to assess students' clinical knowledge, skills, problem solving ability and professional attitudes. Evidence must be produced on the assessment of aseptic technique, administration of medications and professional nursing competencies.

Clinical Assessment Guidelines

1. Mode of Assessment

Continuing Clinical Assessment (CCA) is adopted to assess the clinical competency of the students. CCA is an on-going process of clinical assessment of the students over a period of time during their clinical placement. It consists of 5 components, including teaching, demonstration, practice, feedback and evaluation. The CCA should cover the following areas of assessment.

2. Areas of Assessment

2.1 Aseptic Technique

The student will be assessed on his/her competence in carrying out a nursing procedure on a client involving the use of aseptic technique. This can be any one of the following procedures:

- ✧ Wound dressing/ wound irrigation/ wound packing
- ✧ Pressure ulcer dressing
- ✧ Removal of drains
- ✧ Removal of stitches/clips
- ✧ Urinary catheterization
- ✧ Other procedures that require the application of the principles of asepsis

2.2 Administration of Medications

The students will be assessed on his/her competence in administering medications to his/her clients. This can be **either one** of the following:

- ✧ Administering oral medications to 6-8 clients:
 - Tablets/capsules/liquids/crushed tables, **or**
- ✧ Administering parenteral medication to 1-2 clients via any one of the following routes:
 - Intradermal
 - Subcutaneous
 - Intramuscular
 - Intravenous

2.3 Professional Nursing Competencies

The student will be assessed on his/her assessment techniques and application of the nursing process in providing total patient care. The key competencies assessed will include:

- ✧ Assessment
- ✧ Planning
- ✧ Intervention
- ✧ Evaluation
- ✧ Professional behaviour

3. Assessor

- 3.1 The role of the assessor is to act as the agent for the NCHK and he/she is responsible to certify whether the student is safe to practice in the selected areas of clinical situation.
- 3.2 Educational institutions will be responsible for the appointment of clinical assessors for the nursing programmes they organized.

Part VI.

Special Considerations

It is the responsibility of the training institution to ensure that their students fulfill the requirement of the Nursing Council of Hong Kong.

Special considerations will be given to a person if that person has already enrolled in Part I (General) of the enrolment of the Nursing Council of Hong Kong -

- (i) A maximum of 30% of the requirement on theoretical instruction for Registered Nurse training as stipulated in this syllabus can be exempted. The Guidelines on Exemption of Requirement on Theoretical Hour for Registered Nurse (General) training is at **Appendix 4**.
- (ii) A maximum of 200 hours on clinical practice requirement for Registered Nurse training as stipulated in this syllabus can be exempted on condition that he/she must have an aggregate of at least one year post-enrolment experience in providing basic nursing care in clinical settings before the commencement of such clinical practice.
- (iii) There should not be any exemption granted for the three clinical assessments required for Registered Nurse (General) training, namely aseptic technique, administration of medications and professional nursing competencies, for the need of upholding standard of the profession.

VII. APPENDICES

Essential Topics

Competence area 1: Professional, Legal and Ethical Nursing Practice		
Item	Topics	Minimum Hours*
1A.	General, Behavioural and Life Sciences Relevant to Nursing	320
<i>1A.1.</i>	<p><i>Human Anatomy and Human Physiology</i></p> <ul style="list-style-type: none"> ☞ Basic understanding of the human cell, organs and organelles ☞ The organization, structure, functions and interrelationship of the major body systems including: <ol style="list-style-type: none"> 1. Alimentary System 2. Cardiovascular and Lymphatic Systems 3. Dermatological System 4. Endocrine Systems 5. Genito-urinary System 6. Haematological System 7. Musculo-skeletal System 8. Neurological System 9. Ophthalmic System 10. Oto-rhino-laryngeal System 11. Reproductive System 12. Respiratory System 	(180)
<i>1A.2.</i>	<p><i>Sociology of Health</i></p> <ul style="list-style-type: none"> ☞ The changing social structure and the health care system ☞ The socio-economical, political and cultural impact on health beliefs and illness behaviours ☞ Stigmatization ☞ Professionalisation of health care providers ☞ Influence of technological advancement on health beliefs and illness behavior 	(40)
<i>1A.3.</i>	<p><i>Applied Psychology</i></p> <ul style="list-style-type: none"> ☞ Psychological development and maturation ☞ Basic concepts of psychosocial needs and potentialities of people throughout the life span ☞ Gender and sex-typing ☞ Introduction to the psychology of health ☞ Introduction to learning theories ☞ Perception ☞ Motivation ☞ Emotions ☞ Stress and coping ☞ Personality 	(40)

* Figures in bold and italics are the total hours for the subject, and those *in brackets are the breakdown of hours for reference only*

Competence area 1: Professional, Legal and Ethical Nursing Practice (Cont'd)		
Item	Topics	Minimum Hours*
1A.	General, Behavioural and Life Sciences Relevant to Nursing (Cont'd)	
1A.4.	<p><i>Fundamental Pharmacology</i></p> <ul style="list-style-type: none"> ☞ Basic concepts of pharmacokinetics ☞ Major drug classifications and drug effects ☞ Forms of medication and client care applications ☞ Safety in drug therapy and client care ☞ The related laws and ordinances <p>(For topics relating to calculating, measuring, administering medications and the related nursing care and responsibilities, please refer to Appendix 2 “Basic Nursing for Safe Practice”)</p>	(20)
1A.5.	<p><i>Microbiology</i></p> <ul style="list-style-type: none"> ☞ Introduction to Microbiology <ol style="list-style-type: none"> 1. Nature of micro-organisms 2. Classification and identification of micro-organisms 3. Structure and characteristics of micro-organisms, and bacterial pathogenicity 4. The chain of infection 5. Bacterial growth and physiology 6. Anti-microbial and anti-viral agents 7. Sterilization and disinfection ☞ Infection and Immunity <ol style="list-style-type: none"> 1. Innate and acquired immunity 2. Bacterial and viral pathogens and associated diseases 3. Fungal pathogens and parasitic infections 4. Prevention and control of communicable diseases in: <ul style="list-style-type: none"> - the community - clinical settings 	(30)
1A.6.	<p><i>Nutrition and Dietetics</i></p> <ul style="list-style-type: none"> ☞ Basic concepts about food and nutrients ☞ A balanced diet for growth and optimal health ☞ Therapeutic diets (to be included in the ‘therapeutic measures’ in <i>medical and surgical nursing in relation to illness prevention and health restoration of clients with alteration in various body system functions, Appendix 3</i>) ☞ Industrialization, urbanization and changes in food habits <p>Economics in the choice of food</p>	(10)

* Figures in bold and italics are the total hours for the subject, and those *in brackets are the breakdown of hours for reference only*

Competence area 1: Professional, Legal and Ethical Nursing Practice (Cont'd)		
Item	Topics	Minimum Hours*
1B.	Professional Nursing Practice	712
1B.1.	<p><i>The Nursing Profession</i></p> <ul style="list-style-type: none"> ☞ History of nursing ☞ Definition of nursing ☞ Philosophy of nursing ☞ Nursing theories and models ☞ Roles of the nurse ☞ Advanced practice ☞ Legal and ethical issues (Please refer to Item 1C for details.) 	(4)
1B.2.	<p><i>Basic Nursing for Safe Practice</i> (Please refer to Appendix 2 for details)</p> <p><i>I. The Nursing Process - A Problem Solving Approach</i></p> <p><i>II. Essential Nursing Techniques in Clinical Settings for Safe Practice:</i></p> <ol style="list-style-type: none"> 1. Provision of a safe and comfortable environment for care 2. Maintenance and promotion of occupational safety and health 3. Documentation and reporting of care 4. Helping the client to meet the basic needs of living 5. Assisting the client to undertake diagnostic procedures 6. Administration of medications 7. Principles of First Aid 8. Infection control 	(190) (Covering Parts I and II)

* Figures in bold and italics are the total hours for the subject, and those *in brackets are the breakdown of hours for reference only*

Competence area 1: Professional, Legal and Ethical Nursing Practice (Cont'd)		
Item	Topics	Minimum Hours*
1B.	Professional Nursing Practice (cont'd)	
1B.2.	<i>Basic Nursing for Safe Practice (cont'd)</i>	
	<i>III. Principles and Practice of Nursing</i>	
	1. Accident and Emergency (A&E) Nursing	(4)
	2. Peri-operative Nursing and Anaesthetic Nursing	(8)
	3. Medical and Surgical Nursing in relation to illness prevention and health restoration of clients with alteration in various body system functions across the life span (Please refer to Appendix 3 for details)	(214)
	4. Rehabilitative Nursing	(16)
	5. Oncology Nursing and Palliative Care	(16)
	6. Paediatric and Adolescent Nursing	(50)
	7. Obstetric Nursing	(40)
	8. Gerontological Nursing	(30)
	9. Mental Health Nursing	(40)
	10. Public Health and Community nursing	(40)
	11. Communicable Diseases and Related Nursing	(20)
	12. Chinese Medicinal Nursing and Complementary and Alternative Medicine	(40)
	(Please refer to Appendix 2 for the essential contents of individual topics.)
